

## CS/M.TECH(ECE)/SEM-2/MCE-205B/2011 2011

## IMAGE PROCESSING \& PATTERN RECOGNITION

Time Allotted : 3 Hours

Full Marks : 70

The figures in the margin indicate full marks.
Candidates are required to give their answers in their own words as far as practicable.

Answer question no. 1 and any four from the rest.

$$
7 \times 2=14
$$

1. i) Write down the discriminant function equation.
ii) What is unsupervised data?
iii) $\quad \mathrm{D}_{8}(p, q)=\max (|x-s|,|y-t|), S=\left\{q \mid \mathrm{D}_{8}\right.$ $(p, q) \leq r\}$ forms a sequence-justify the statement.
iv) $\left.\quad X s(t)=X(t) \operatorname{comb}(t)\left(t, \Delta t_{s}\right)\right) X s(w)=X(w) *$ $f\left(\operatorname{comb}\left(t, \Delta t_{s}\right)\right)$ - justify the statement.
v) Discuss any two thresholding techniques used in image segmentation.
vi) Illustrate the thresholding techniques with proper example.
vii) What is pattern recognition?
2. i) Explain city block distance and chers board distance.
ii) What is the Skeletanisation ?
iii) How do you obtain Skeletone from an image ?
iv) What is distance transformation?
3. i) Explain the block diagram of Digital image processing.
ii) What is the need of image digitization ?
iii) Prove that $\mathrm{N}_{4}(p) \cap \mathrm{N}_{\mathrm{D}}(p)=\phi$
iv) Explain the adjucency of pixel.
v) Explain sampling theoremusing Dirac-Delta function.

$$
5+2+2+2+3
$$

4. i) When we will use the Least Square Methods to design a classifier ?
ii) Describe yhe expression for new weight vector using Least Square Method.
iii) In a 2D space we have four points ( $-1,0$ ) ( 0,1 ) belongs to $\mathrm{W}_{1}$. and points ( $0,-1$ ) ( 1,0 ) belongs to $\mathrm{W}_{2}$. Design a linear classifier using the Perceptron Algorithm in its reward and punishment form. The parameter $p$ is set equal to one and initial weight vector is chosen as $\mathrm{W}(0)=\left[\begin{array}{lll}0 & 00\end{array}\right]^{\mathrm{T}}$.
iv) What do you mean by "Reward \& Punishment method".

$$
1+6+6+1
$$

5. Write short notes :
i) Image mining/retrieval techniques.
ii) Clustering algorithms.
iii) Basic technique for Eigen Face Generation/Recognition.
6. i) What is Pattern Recognition ?
ii) Explain the different application of Patfern Recognition?
iii) What are the different types of Pattern Recognition?
iv) Class $\mathrm{W}_{1}$ consists of the 2D vectors [ $\left.0.2,0.7\right]^{\mathrm{T}}$, [ $0.3,0.3]^{\mathrm{T}}$ and class $\mathrm{W}_{2}$ of $[0.4,0.6]^{\mathrm{T}}$ [ $0.6,0$. 2] ${ }^{\mathrm{T}}$. Design the classifier using Sum of Error Squares Method.
7. a) Consider the following $5 \times 5$ image represented by the gray level values of the pixel.

| 3 | 4 | 2 | 1 | 1 |
| :---: | :---: | :---: | :---: | :---: |
| 1 | 6 | 7 | 0 | 0 |
| 1 | 5 | $\underline{5}$ | 2 | 3 |
| 2 | 6 | 1 | 2 | 3 |
| 6 | 7 | 1 | 0 | 4 |

Apply the image smoothing filters as per following specification assuming $f(2,2)$ as the centre pixel underlined in the image where $3 \times 3$ the mask is to be applied
i) Mean filter
ii) Minimum filter
iii) Maximum Filter
iv) Median Filter
v) Weighted filter with mask as

| 1 | 2 | 4 |
| :--- | :--- | :--- |
| 3 | 2 | 1 |
| 0 | 1 | 4 |

$$
2+2+2+2+2
$$

b) Apply suitable contrast stretching methods on the following image as per given specifications
i) For $\mathrm{V}=\left[\begin{array}{ll}0 & 1\end{array}\right]$, Compute $\mathrm{D}_{4}, \mathrm{D}_{8}$ and $\mathrm{D}_{\mathrm{m}}$ distance between points $p$ and $q$.
ii) For $\mathrm{V}=[1,2]$, Compute $\mathrm{D}_{8}$ distance between $p$ and $q$, Comment on your computation.

| 3 | 1 | 1 | 1 | $1(q)$ |
| :---: | :---: | :---: | :---: | :---: |
| 1 | 1 | 2 | 0 | 2 |
| 1 | 2 | 2 | 0 | 1 |
| 1 | 2 | 0 | 1 | 1 |
| $(p) 1$ | 0 | 1 | 0 | 2 |
