

# CS/BSM(NEW)/SEM-2/BSM-202/2012 2012 STATISTICS - II Full Marks : 70 

Time Allotted: 3 Hours

The figures in the margin indicate full marks.
Candidates are required to give their answers in their own words as far as practicable.

## GROUP - A

## (Multiple Choice Type Questions )

1. Choose the correct alternatives for any ten of the following :

$$
10 \times 1=10
$$

i) If $\bar{A}$ be the component of an event $A$, then
a) $\quad P(\bar{A})=1-P(A)$
b) $\quad P(\bar{A})=P(A)$
c) $\quad P(\bar{A})=P(A)-1$
d) none of these.
ii) For a binomial distribution with parameters $n=4$, $p=\frac{1}{3}$, the variance is
a) $\frac{2}{9}$
b) $\frac{4}{3}$
c) $\frac{8}{9}$
d) $\frac{2}{3}$.
iii) The chance of throwing an even number amity an ordinary six faced die is

a) $\frac{1}{2}$
b) $\frac{1}{6}$
c) $\frac{1}{3}$
d) none of these.
iv) The mean of a binomial distribution is
a) $n p q$
b) $n p q^{2}$
c) $n p$
d) $\quad n^{2} p^{2}$.
v) The mean of a uniform distribution $f(x)=k$, $a<x<b$ is
a) $\frac{a}{a+b}$
b) $\frac{a+b}{2}$
c) $\frac{a-b}{2}$
d) none of these.
vi) The regression lines are $2 x+3 y-4=0$ and $x+2 y+6=0$. The correlation coefficient between $x$ and $y$ is
a) $-\frac{3}{4}$
b) $-\frac{4}{3}$
c) $\frac{3}{4}$
d) $\frac{4}{3}$.

vii) Two samples of sizes 9 and 8 give the sum of squares of deviations from their respective means equal to 160 inches $^{2}$ and 91 inches $^{2}$ respectively. Then their $F$-distribution is
a) $\frac{20}{13}$
b) $\frac{160}{91}$
c) $\frac{13}{20}$
d) $\frac{91}{160}$.
viii) Sampling distribution is usually the distribution of
a) parameter
b) statistic
c) mean
d) variance.
ix) A binomial distribution may be approximated to a Poisson distribution provided
a) $\quad N$ is small $\& p$ is large b) $\quad N$ is large $\& p$ is small
c) $\quad N$ is small $\& p$ is small d) $\quad N$ is large $\& p$ is large.
x) In chi-square test, the sample observation must be
a) dependent
b) independent
c) both (a) and (b)
d) none of these.
xi) Sampling errors occur due to
a) substitution
b) negligence
c) framing
d) compilation.
xii) The percentage area under standard normal curve between -2 and 2 is
a) $68 \cdot 27$
b) 95.45
c) $\quad 99 \cdot 73$
d) none of these.
[ Turn over
xiii) The mean of the chi-square distribution with n degrees of freedom is

a) $2 n$
b) $n^{2}$
c) $\sqrt{n}$
d) $n$.
xiv) The power of a test is the probability of
a) rejecting a true null hypothesis
b) rejecting a false null hypothesis
c) accepting a false null hypothesis
d) none of these.
$\mathrm{xv})$ Students $t$ distribution is symmetric
a) always
b) at $t=\frac{1}{2}$
c) $\quad$ at $t=0$
d) $\quad$ at $t=1$.
GROUP - B
( Short Answer Type Questions )

Answer any three of the following. $3 \times 5=15$
2. Two persons $A$ and $B$ toss an unbiased coin alternatively on the understanding that the first who gets the head wins. If $A$ starts the same, find their respective chances of winning.

$$
3+2
$$

3. In a lottery, $m$ tickets are drawn at a time out of $n$ tickets numbered from 1 to $n$. Find the expected value of the sum of the numbers on the tickets drawn.
4. If following data are the number of seeds germinating out of 10 on damp filter paper for 80 sets of seeds. Fit a binomial distribution to the following data :

| $x:$ | 0 | 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 | 9 | 10 |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| $y:$ | 6 | 20 | 28 | 12 | 8 | 6 | 0 | 0 | 0 | 0 | 0 |

 67.5 cm and 68.0 cm respectively. Can the samples be regarded as drawn from the same population of S.D. 2.5 cm ?
6. There are three bags : first containing 1 white, 2 red, 3 green balls; second containing 2 white, 3 red, 1 green balls and third containing 3 white, 1 red, 2 green balls. Two balls are drawn from a bag chosen at random. These are found to be one white and one red. Find the probability that the balls so drawn came from the second bag.

## GROUP - C

## ( Long Answer Type Questions )

Answer any three of the following. $3 \times 15=45$
7. a) The probability density function of a variable $x$ is given :

| $X:$ | 0 | 1 | 2 | 3 | 4 | 5 | 6 |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- |
| $P(X):$ | $k$ | $3 k$ | $5 k$ | $7 k$ | $9 k$ | $11 k$ | $13 k$ |

i) Find $P(X<4), P(X \geq 5), P(3<X \leq 6)$
ii) What will be the minimum value of $k$ so that $P(X \leq 2)>3$ ?
b) A problem is mechanics is given to three students $A, B$ and $C$ whose chances of solving it are $\frac{1}{2}, \frac{1}{3}$, and $\frac{1}{4}$ respectively. What is the probability that the problem will be solved.
c) If the probability of a bad reaction from a certain injection is 0.001 , determine the chance that out of 2000 individuals more than two will get a bad reaction.

CS/BSM(NEW)/SEM-2/BSM-202/2012
8. a) In a city $A, 20 \%$ of a random sample of 900 school boys had a certain slight physical defect. In another eity) $B$, $18 \cdot 5 \%$ of a random sample of 1600 school boys had the same defect. Is the difference between the proportions significant?
b) The nine items of a sample have the following values :
$45,47,50,52,48,47,49,53,51$. Does the mean of these differ significantly from the assumed mean of 47.5 ? $8+7$
9. a) The average marks obtained by two groups in an examination were found to be 75 and 85 respectively. Determine the ratio of students in the two groups if the average marks for all students was 80 .
b) The following table gives the number of aircraft accidents that occurred during various days of the week. Find whether the accidents are uniformly distributed over the week :

| Days | Sun | Mon | Tue | Wed | Thur | Fri | Sat |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| No. of accidents | 18 | 20 | 9 | 12 | 11 | 7 | 15 |

Given $\lambda_{0.05,6}^{2}=12 \cdot 59 . \quad 7+8$
10. a) Fit a Poisson distribution to the following data and test for its goodness of fit at level of significance 0.05 :

| $x:$ | 0 | 1 | 2 | 3 | 4 |
| :---: | :---: | :---: | :---: | :---: | :---: |
| $f:$ | 419 | 352 | 154 | 56 | 19 |

b) Let $X[\mathrm{~cm}]$ and $Y[\mathrm{~cm}]$ be the diameters of a pin and a hole respectively. Suppose that $(X, Y)$ fias the density

$$
f(x, y)=\left\{\begin{array}{l}
625, \text { if } 0 \cdot 98<x<1 \cdot 02,1 \cdot 00<y<1 \cdot 04 \\
0, \text { otherwise }
\end{array}\right.
$$

i) Find the marginal distributions.
ii) What is the probability that a pin chosen at random will fit a hole whose diameter is 1.00 ?

$$
7+8
$$

11. a) In a referendum $60 \%$ of voters voted in favour.

A random sample of 200 voters was selected. What is the probability that in the sample
i) more than 130 voted in favour ?
ii) between 105 and 130 inclusive voted in favour ?
iii) 120 voted in favour ?
b) $\quad A$ and $B$ throw alternatively with a pair of dice. $A$ wins if he throws 6 before $B$ throws 7 and $B$ wins if he throws 7 before $A$ throws 6 . If $A$ begins, find his chance of winning. $8+7$
$=1=$ = $=$ = $=$ = $=$ = $=$
